EUROPEAN & DOMESTIC TREE & SHRUB SEED

It would be wrong to start this list without mentioning the prompt response which our request for early orders met. Thank you sincerely for this co-operation. Crop reports from Japan confirm our goal. *Ulmus Pamila* has been delivered. Many of the European Cherries are enroute but by cabling we may be able to take care of late orders. Let us hear from you.

Please note that the following seeds are no longer available:-

Ulmus Pamila *Ulmus parvifolia* *Cydonia Japonica*

We are still able to book all our other listings but sincerely hope that you will let us have your order at once. We quote below seeds of Domestic and European varieties. Our list is comprised only of seeds which we know from thorough investigation come from the most reliable sources. We solicit your orders with the feeling that you will be highly pleased with our deliveries.

A FLORIST'S BONANZA

WE CALL ATTENTION to a *Novelty* which is bound to develop into a large business for *Ornamental* and *Productive* purposes.

Mr. C. K. Philips has developed in Florida a hardy Banana plant of the finest species, the Tenerife Cavendish strain, and he has appointed us his sole agents.

The plant or bulb will grow anywhere, where it is kept from freezing, as far North as Canada; it can be shipped anywhere, it is shipped without roots and in this condition it

will retain its vitality for weeks, starting to grow as soon as planted in pots, tubs or the open. In suitable surroundings it will produce fruit within five to six months and as much as 100 lbs. of the best Bananas.

The present is a good time for shipping and planting.

We offer the plants or bulbs (weighing from 8 oz. upwards) to the *Trade* as follows:—

Shipments of	5 plants for	\$2.00 f.o.b., Oviedo, Fla., cash with order or C. O. D.
